**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1,148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1,4,8,11,24,28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiemer 6193079 in view of Rankin, VI 6464089. Wiemer teaches a merchandising system having a mount 46 which couples by way of snap fit to multiple locations on base 19 and further including a suspending member 70 which is comprised of a hook

with a curved portion 74 at the end. Weimer also teaches a track portion 62 having a front and a rear and positioned above the suspending member. Rankin, VI teaches a merchandising system having track 14, a biasing member 52 and a pusher 36. To provide the merchandising system of Wiemer with a pusher having a biasing mechanism as taught by the merchandising system of Rankin, VI for the purpose of advancing merchandise toward the consumer to facilitate sales would have been obvious for one having ordinary skill in the art at the time of the invention.

Applicant has amended claim 1 to recite that the mount is "coupled to the rear portion of the biasing system, the mount configured to couple to a base; a member positioned underneath the track and configured to suspend articles underneath the track for selective removal therefrom" and a biasing mechanism "mounted to the track, the biasing mechanism having a pusher and being biased to move the articles in a direction from the rear portion of the track toward the front end portion of the track". Applicant has further amended claim 4 to specifically recite that the member is "positioned underneath the track".

In the above rejection, the teaching of the member recited in the claims is supplied by element 70 of Weimer. The teaching of the "track" is supplied by element 62 of Weimer. As also cited in the above rejection, the teaching of a biasing and pushing member is supplied by Rankin, VI. It is the position of the examiner that to provide the Weimer track with a biasing and pusher member as taught by Rankin, VI for the

purpose of better advancing merchandise 14 would have indeed been obvious for one having ordinary skill in the art at the time of the invention.
